COAL OPERATORS TO CONFER ON STRIKE ON FRIDAY

INDICATIONS ARE JOINT MEETING OF OPERATORS AND MINERS WILL BE HELD NEXT WEEK

Chicago, July 29—(United Press)—Thomas Brewster, chairman of the executive committee today summoned coal operators of the central competitive fields to confer in Chicago Friday to decide the stand they will take in the proposed joint conference with union officials in an attempt to settle the unauthorized strike paralyzing bituminous coal production. Union officials in executive session in Indiana were reported to have completed their conference. They were expected to demand increased wages for the strikers.

Indications were the joint meeting will be held next week in Washington and the attitude of the federal government toward granting a pay advance secured have been decided, it is announced. Operators declared official sanction necessary because railroad coal prices would be effected.

Secretary of Labor Wilson was reported preparing a detailed statement of the situation for presentation to President Wilson. Strikers were still holding out with the Illinois and Indiana fields virtually closed.

Predicts Strike End in Two or Three Days

Springfield, Ill., July 29—The strike of 75,000 Illinois miners will end in two or three days in the judgment of Frank Farrington, president of the Illinois miners union, he said today.

St. Louis Mayor Seizes Coal for Industries

St. Louis, July 29—Coal supplies in St. Louis today were seized by the city for distribution to essential industries because of the unauthorized strike of miners. Declaring the emergency so critical federal agents took action toward relief which could not be awaited and an emergency committee appointed by Mayor Keel acted today.

COAL OPERATORS WILL CONFER FRIDAY

(United Press)

St. Louis, Mo., July 29—Coal operators of the central competitive fields will confer Friday in Chicago over the situation caused by the unauthorized strike in the bituminous fields. Thomas Brewster chairman of the operators committee, announced today.

PRESIDENT WILL TAKE HAND IN COAL STRIKE

(United Press)

Washington, July 29—President Wilson shortly will take a hand in the coal strikes in Indiana and Illinois, it was stated at the White House today. It was intimated, however, that Wilson's action will depend on a report which is to be submitted to him by Secretary of Labor. Wilson, who was called back to Washington in connection with the strike. This report is being prepared at the president's request.

EXTRADITION OF TRUNK MURDERER ASKED OF MEXICO

ELLIS LEWIS GARRETSON

Ellis Lewis Garretson of Tacoma, Wash., was elected imperial potente at the recent annual meeting of the Shrine at Portland, Ore.

DAGO FINANCIER DREW MASCOT FOR A WIFE

(By United Press)

Boston July 29—Lady luck played a fickle hand with Chas. Ponzi, one time waiter, dishwasher and university graduate, whose frenzied financial methods are under investigation.

The dabbler young Italian who landed in the United States in 1913 with \$2.50 and whose holdings in cash now amount to \$12,000,000 said good fortune first smiled on him when she crossed his pathway. She was Rose Guecco daughter of a wholesale fruit dealer here.

Ponzi in 1918 married Miss Guecco. From that time on he made money.

His dealings in international postal reply coupons through which he made millions, were under federal probe today. Governor Calvin Coolidge also was prepared to order state inquiry.

Governor Orders Investigation

Boston, July 29—Governor Coolidge today ordered Attorney General Wesley Allen to begin an immediate investigation into the business of Chas. Ponzi, Boston "bushel basket millionaire," who in eight months claims to have made \$12,000,000 dealing in international postal reply coupons.

United States District Attorney Dan Gallagher was prepared today to begin auditing Ponzi's accounts.

Explain How Money Is Made

Washington, July 29—Operation by which profits were made in trading in international money orders and stamps was explained here today.

A money order for a pound sterling could be bought in London for a little less than \$4.00 American money. In this country the order brought \$4.57. Great Britain stood the loss until that government hit upon a plan of stopping the practice by taxation. No other countries have done this however. In the same way Italian five cents stamps could be bought for one cent American money and could be cashed for five cents or sold to stamp dealers for four cents.

This report is being prepared at the president's request.

Rings and Scales of Fishes.

A case of chronic anilin poisoning, manifesting all of the typical symptoms, namely, vertigo, gastritis, diplopia, asthenia and exfoliated dermatitis, is reported by Thompson. The cause of the poisoning was a French hair dye called "Goutte Agouti." The type of anilin was paraphenophenamine, 2 per cent; hydrogen peroxide, 70 per cent, and alcohol, 28 per cent. Thompson points out that the menace of anilin hair dyes has not yet sufficiently been emphasized to be appreciated generally by the medical profession. The fact that personal susceptibility varies as much as in the case of poisoning, for example, from Rhus toxicodendron, only makes it more difficult always to recognize such cases. It is well to be suspicious of artificial Titan red hair and all the darker shades up to jet black.

Signals of Royal Travel.

When King George travels the locomotive drawing his train carried by day three disks bearing the royal arms, while by night it carries four lights—two white, a green and a purple.

CLOSE FREIGHT DEPOTS THREE DAYS EVERY WEEK

INTERSTATE COMMERCE COMMISSION IS CONSIDERING THE ADVISABILITY OF SUCH ACTION

(United Press)

Washington, July 29—The interstate commerce commission is considering the advisability of closing freight depots three days a week officials of the commission said today. The proposal, it was learned, has come from big shippers who say it will give them a more equitable share of the car supply. It was understood the railroad executives say the closing of the freight depots would result in thousands of railroad employees being put on half time.

NEW LIGHT FOUND ON TRUNK MURDER

(By United Press)

Akron, Ohio, July 29—Detective McDonnell today said new light was cast on the mysterious trunk murder of Mrs. Katherine Leroy of Detroit when he talked with John Talmo, at the Birmingham state prison Wednesday.

Talmo, according to McDonnell, admitted his attentions to Mrs. Leroy, and said Mr. Leroy was aware of it.

He told McDonnell jealousy was the cause of the murder. Talmo told the detective that another trunk containing the woman's tongue and other organs had been shipped elsewhere.

The Detroit detective arrived in Birmingham Wednesday morning and followed the new clue, McDonnell said.

VILLAS SURRENDER OFFICIALLY CONFIRMED

(By United Press)

Washington, July 29—Official confirmation of the surrender of Villa, Mexican rebel leader, to the new Mexican government reached the state department today from the American consul at Piedras Negras.

While a demand by this government for the extradition of Villa for his indictment on the Columbus-New Mexico raids in 1916 is possible, it was said no plans are being considered.

MONOPLANE FLIGHT TO SAN FRANCISCO

(By United Press)

New York, July 29—Three of the metal monoplanes left here today on a flight to the Pacific coast as a earthfinding party for the New York-San Francisco air mail service to be inaugurated in September.

Governor Coolidge Milking Cow While on Vacation at Father's Farm

Governor Coolidge went to his father's farm in the Vermont hills for a restful vacation in preparation for the hard work of the coming campaign. While there the Republican nominee for the vice-presidency prepared his speech of acceptance but he found time to do a lot of the chores of his boyhood days over again. He is seen here milking one of the cows.

Late photo of the governor general of the Philippines.

PRESIDENT WILL ACKNOWLEDGE COX AS PARTY LEADER

BY ISSUING A FORMAL STATEMENT AFTER HIS NOTIFICATION ON AUG. 7

HERBERT WALKER

(United Press Staff Correspondent) Dayton, O., July 29—President Wilson shortly after notification of Governor James M. Cox on August 7 will issue a statement acknowledging the nominee as the new party leader, it was reported in the Cox camp today.

Indications were this move will be discussed today by George White, new chairman of the democratic national committee in Washington. Wilson was prepared to give the nominee's exact views. From reliable sources it was learned Wilson and other close advisors of Cox are anxious for the President to hand over publicly the party reins.

Back of the move it was apparent six republican leaders have initiated a propaganda campaign claiming that the president as a result of the White House conference with Cox intends to dictate the nominee's policies.

Cox Is Leader Says Chairman

Washington, July 29—Governor J. M. Cox as democratic presidential nominee must be considered the new leader of his party George White said today.

The new chairman of the democratic national committee also said he has made no arrangements for a conference with President Wilson during his two days' stay in Washington, declaring he had come here to take charge of the party headquarters and meet the democratic leader.

It was learned that President De la Huerta's expedition against Cantu will attempt to operate from bases to be established on east coast points and west coast points controlled by Cantu following Francisco Villa's agreement to surrender. The De la Huerta government evidently feels it has only to extend its sway to lower California to have all of Mexico under control of the federal authorities for the first time since the downfall of Diaz.

Vila having accepted all conditions of surrender, was expected to move to Torreon where his men will demobilize.

Amusing stories were told of the negotiations of Villa and General Martinez preliminary to surrender. They walked arm in arm in the most friendly manner along the plaza at Sabinas discussing the terms while each kept one hand on his revolver.

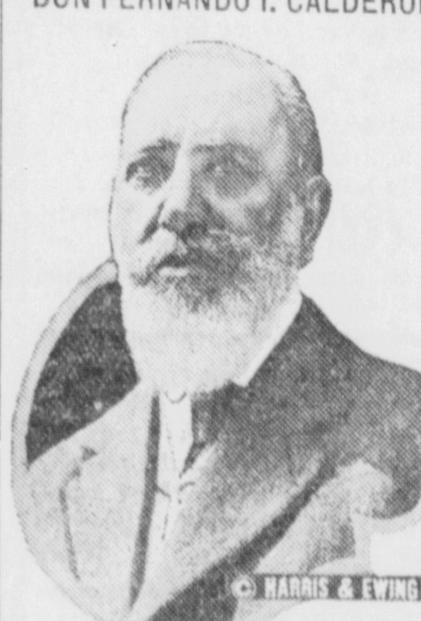

Villa was said to have been promised his men will be given every opportunity to get work and will also receive one year's pay.

TWO BANK BANDITS GET \$16,500 IN COL.

(By United Press)

Denver, Colo., July 29—Posse of three counties today were hunting for two bandits who late yesterday robbed the state bank at Peyton, Colorado of \$16,500 in cash and securities. The bandits locked the assistant cashier and a customer in the vault, looted the bank and escaped.

DON FERNANDO I. CALDERON

Don Fernando Iglesias Calderon, special high commissioner of Mexico with the rank of ambassador, has just arrived in Washington from Mexico City. He will assist in this country with the efforts now being made to effect an agreement between the Villistas and the new De la Huerta government.

WILL U. S. TAKE PART IN RUSSIAN PEACE PARLEYS?

QUESTION ENTIRELY ONE FOR THE PRESIDENT TO DETERMINE SAY OFFICIALS

C. BRADFORD

(United Press Staff Correspondent) Washington, July 29—Whether the United States is to have any part in the peace negotiations between the allies and Russia is a question for determination by President Wilson alone, officials here said today.

Officials regard it as inconceivable that the United States, which has always been friendly to the Russian people, would not be invited to such a conference. Should the conference be held between the allies and soviets, President Wilson might state the position of the United States through an official or unofficial delegate, or in a note replying to the invitation.

N. Y. TO ALASKA AVIATORS LEAVE EDMONTON

(United Press)

Edmonton, Alberta, July 29—The United States army aviators enroute from New York to Nome, Alaska, left Edmonton at 9:30 today for Jasper, three hundred miles northwest of Edmonton over the Grand Trunk railroad. The machines were thoroughly gone over and prepared for the hardest part of their journey, across the Canadian-Alaskan wilds.

MAKE HOPE BOX CONTAIN A HOME AND MOTOR CAR

(By United Press)

St. Paul, July 29—"We are going to make woman's 'hope box' larger than her trousseau. It is going to contain the home and perhaps the motor car." Mary Stewart has this view of the effect of national federation of business and professional women's clubs in session here. She believes organization will do for women what the chamber of commerce and other organizations have done for men.

She believes women will have the greatest steady influence possible in business because she has the protective race instinct, and service is a conscious thing with her.

"We want to give valuable receipts for what we get and we want to make our work count."

"Women have been recognized in business but not rewarded."

MEANT TO CALL THEM QUICK

Aunt Dinah Had No Idea of Allowing for Misunderstanding When She Rang the Bell.

Aunt Dinah, plantation born and reared, went to a nearby town to "hire out." She was very promptly hired by a young housewife, who, seeing her lack of familiarity with modern households, started to train her.

She showed Aunt Dinah her small silver-service bell—there were no electric bells in the old-fashioned house—and told her that when it was rung she must come into the dining room. Aunt Dinah said she understood. A few days later the mistress was sent on the broad veranda with a friend when she heard a tremendous clangor from the direction of the kitchen. It came nearer swiftly and soon identified itself as the sound of a large bell.

Puzzled, the housewife entered the hall and there stood Aunt Dinah, swinging a large dinner bell vigorously. "Why, what on earth is the matter, Aunt Dinah?" she gasped. "Why are you ringing that bell?"

"Well, Miss Mary, I thought dat was the way folks called each other in dis here house. Didn't you show me yo' bell the other day? I found dis one in de cupboard and I wanted you right quick in de kitchen, so I rung hit."

Labor Savers.

At a home in North Delaware street the man of the house gathered two or more bushels of nuts last fall and put them in the attic. His wife spends most of her time at the office with him, so the house is empty every day. However, recently the wife remained home one day and heard a terrific noise in the attic. Investigating she found two squirrels rushing around like mad, trying to get out of a closed window. They had gnawed a hole in the roof as large as a grapefruit and had disposed of the whole mess of nuts. The owner said they saved him the trouble of feeding them, for he had gathered the nuts for them.—Indianapolis News.

NO WORD RECEIVED FROM VESSEL REPORTED ON FIRE

(By United Press)

New York, July 29—The vessel which was reported afire off the Jersey coast Monday was believed to have been the Kehuku, operated by the Columbia Shipping Co.

The company announced no word had been received from the vessel since she sailed Monday. Efforts to get into communication with her they said proved fruitless. She carried forty men.

THE WEATHER

Forecast for next 24 hours: Minnesota—Fair tonight and Friday, slightly cooler near Lake Superior.

Cooperative observer's record: July 28—Maximum 83, minimum 58. Reading in evening 62. Northwest wind. Clear. July 29—Minimum during the night, 54.

LAUDS COUNTY AGENT E. G. ROTH

Farmers Clubs Re-Organized. Potato

Culture and Dairying are Given an Impetus

(From Farmers Dispatch of St. Paul, July 23 Issue)

By S. E. ELLIOTT

Ask any one of the scores of farmers who are growing potatoes on a commercial scale in Crow Wing county, Minnesota, for a specific example of what the farm bureau organization is accomplishing and it is very probable that you will be told about County Agent E. G. Roth having sold at least one car of potatoes for \$1.25 a bushel when the local price was down to \$1.02.

This, of course, is a high light in last year's activities, but it is a link in a long chain of successful undertakings that in the aggregate have won for Crow Wing the distinction of being one of the best organized of the newer agricultural communities in the state.

The sale of a car lot of potatoes at a premium of 23 cents a bushel is not a record upon which a farmer organization can stand for a year, but when it is backed up by such projects as co-operation in buying dynamite, the organization of several marketing associations, the rejuvenation of nearly a dozen farmer clubs, the establishment of a sheep industry, introduction of pure bred cattle, the purchase of expensive machinery by neighborhoods instead of individuals, in addition to the ordinary thousand and one things that a live farm bureau manager is always doing, it becomes an index by which the work may be gauged.

Started a Year Ago

County Agent Roth undertook the work in Crow Wing county a little over a year ago, the post having been previously filled by E. A. Colquhoun, now in North St. Louis county.

His first undertaking was to get to know farmers of the county as "Tom," "Dick" and Harry." This was accomplished by attending every gathering where there were more than a dozen farmers present. He lost no opportunity to make himself known and to tell his "bosses" what he wanted to do and to get their advice on the various undertakings.

While he was doing this, he arranged his office so that records, data, etc., was of easy access. Once the office was so arranged, office calls were quickly and satisfactorily cared for.

A special study of the soils in Crow Wing county was made, so that he became familiar with the various problems which faced each particular section. It did not take him long to realize that the future of the section lay in growing potatoes and keeping dairy cows, and these are the two major projects upon which he is constantly working.

Farmers Good Co-operators

That the farmers of Crow Wing county are good co-operators is obvious to any one who will study their marketing methods. There are five potato selling associations, which probably will be affiliated with the state selling agency as soon as that begins to function. There are twelve farmer clubs in the county and every one of them is now a live, up-and-doing organization. Three co-operative creameries are well established.

"The farmers up here," says Mr. Roth, "are not wealthy, but they work hard and are determined to overcome the natural obstacles that confront them. Turning cut-over land into a profit producing agricultural section is no simple task. The desire here to advance is well illustrated by the Rye project undertaken last year. I obtained 138 bushels of seed which was distributed to 24 farmers. Frosts in April killed off at least a quarter of the total acreage, but despite this misfortune the variety will be popular next year. Plans are under way to certify this seed, so as to keep the variety pure. You see, up here, farmers are not given to doing things half way."

Soy Beans Introduced

Another phase of Mr. Roth's better agricultural program is his soy bean project. Of the six co-operators who were induced to try the crop last year William Eisner was the most successful. His beans grew over two feet high and actually covered the ground. Other co-operators had varied success; but on the whole, the experiment was so satisfactory that soy beans will become an important crop in the very near future. Wisconsin black seed was used.

In bettering the live stock of the section, Mr. Roth was instrumental

in obtaining the registration of two herds of Red Poll cattle, importing a large number of pure bred calves from Wisconsin to be used in juvenile club work and obtaining eight pure bred bulls and sixteen aged cows. Four milk testing demonstrations were put on which located a large number of boarder cows. These have found their way to the slaughter house and animals of known producing qualities have taken their place. Nine herds have been tested for tuberculosis and 100 head are on the accredited list.

Montana Sheep Imported

In June and July, last year, when the Montana ranges failed and vast numbers of sheep were threatened with starvation, Mr. Roth conducted negotiations with several Montana men which resulted in bringing 8,000 head of sheep and 400 cattle to Crow Wing for summer pasture. The farmers made no charge for the use of their land, as they wanted the sheep, first to see what they would do in the section and second, to help them in clearing their land. Most of the sheep imported were sold for mutton, but 1,200 head were purchased by Crow Wing farmers, as breeding stock.

Sheep marketed made an average gain of 16 pounds per head in six weeks, which resulted in a net profit to the feeders of slightly over \$1 a head, after all expenses had been paid.

Despite the poor wool market sheep in Crow Wing county this year show a material increase.

Dynamite Car Lots

Land clearing is a job that is ever before the Crow Wing farmer and in this work he uses great quantities of dynamite. A car and a half of the explosive was purchased by the farm bureau last year and distributed to farmers at cost, saving them 7 to 10 cents a pound. Next year, the farmers will list their dynamite needs early in the session and the farm bureau and town boards will bunch orders, thereby saving even more.

Crow Wing farmers were especially hard hit last year by the labor shortage. Mines in the vicinity were paving \$5 to \$7 a day, and it was difficult to obtain help at the going wage for farm help—\$4.50. The farmers, assisted by the county agent, managed to get through the season by using high school boys and such experienced help as could be obtained from day to day. A similar plan is being followed this season.

Puts on Silo Campaign

Fifty new silos were built last year largely as a result of a silo campaign. This occasioned a sudden demand for silo filling machinery, which in most instances was purchased on a co-operative basis, six to eight farmers going together to buy one outfit. In the same way clover haulers and other expensive machines were obtained.

Mr. Roth has devoted much time to the co-operative creameries in his county. One now has 303 patrons and is gaining strength each month.

When he entered the field, he found that few farmers understood the relation between the farm bureau and the county agent. A publicity campaign remedied this condition and at present the county has one of the most active, if not the largest, farm bureaus in the state. A very successful membership drive obtained eighty-five new members.

The boy and girl club work is well in hand in Crow Wing county, there having been over \$60 potential farmers and farmers' wives enlisted in twenty-five different clubs this spring.

DISPATCH WANT ADS PAY

CREPE DE CHINE IN WHITE

To appear cool and feel cool is not always possible, but the wearer of this charming frock of white crepe de chine with pipings and sash of navy blue grosgrain ribbon achieves this happy result.

BLACK WITH WHITE ON HATS

Combination is Great Favorite and Always Affords Bit of Smartness That is Desired.

Women never tire of black and white. In summer hats this combination is a great favorite. The all-white hat is rather dead looking, and while a white hat with colored trimming may be very pretty there is a likelihood of its appearing somewhat insipid unless created by an artist. A touch of black on a white hat always brings a bit of smartness.

White organdie hats, much like the old-fashioned lingerie hat that women affected for many summers because it brought eternal youth, are trimmed with puffy flowers of organdie. Then they are swathed with black rulle.

Equally effective are pale yellow organdie veiled with brown net. Taffeta flowers—big puffy ones of dark colors—are sometimes applied to drooping mushroom shapes of white organdie with long, loose stitches of black and a wispy transparent scarf draped over all. Sometimes white organdie blossoms are scattered over black horsehair hats. The versatile organdie plays many roles. It is not unusual to see it ornamenting oilcloth hats in the form of scarfs or applied flowers, and in turn oilcloth may be applied to hats of organdie.

WHAT DAME FASHION SAYS

Hand painting on taffeta hats makes for a novelty in millinery that is having an extensive vogue.

Though filet lace is still in big demand, baby Irish and cluny are fast being accepted as quite the proper trimmings.

Batik decoration is beautifully applied to some smoking sets, and metal and floss embroidery, as well as metal ribbon, is also used.

Models of crepe metor are sometimes on the coat order, others are flowing slip-over robes, looking not unlike Greek drapes when worn.

American manufacturers of corsets—and these are the greatest in the world—say that there will not be any radical changes in corsets this coming fall and winter season.

July Clearance

Hundreds of Yards of Lovely Wash Fabrics at Greatly Reduced Prices

We must make quick disposal of our stock of piece goods to make room for our new Fall line soon to be shown.

We cannot afford to carry them over for another season, and will take a real sacrifice rather than do it.

Let us show you our great bargain specials at 28c, 39c and 49c per yard

They are immense values.

Visit our store often and see the goods not advertised.

B. Kaatz & Son

in gorgee, crepe de chine, lace and net the jacket model over a full length slip prevails, and these are delightfully dainty in color and in the trimming of ribbon, flower garlands and frilly lace and net.

A change in corset lines is said to be essential for the new autumn modes already introduced by Jenny and Calot. These models demand a flat, straight up-and-down line to the figure, both back and front, and a nipped-in effect at the hips.

Paris says black velvet hats—and that means we shall probably accept them. This may be a fabric out of season, but who can deny the effectiveness of a summer costume when topped off, as it were, with a smart hat, large or small, of black velvet?

Never were negligees lovelier in color or materials, nor more interesting in design than at the moment. There are all sorts of models—some brilliant in color and daring in design, others as delicate in color and as delightfully feminine in design as could possibly be desired.

Confetti Trimming.

A French trimming which bids fair to prove popular is known in Paris as "confetti" trimming. This is used generally on a foundation of sheer silk, chiffon or georgette, the latter more frequently seen here. In Paris, according to recent arrivals from that market, it is popular in the many colors characteristic of the real confetti, the trimming being fabric, felt or leather, cut up into the tiniest of spots.

Location at Uranus.

The latest calculations, based on the perturbations of Uranus, are stated by Dr. Eric Doolittle to show that the hypothetical planet beyond Neptune is nearly four billion miles from the sun, and requires 283 years to complete a revolution in its orbit. It is much smaller than other distant planets, with a mass only six times that of the earth. This is a secret of its elusiveness, and its discovery is expected to reveal a minute body of only the twelfth or thirteenth magnitude. Search is now being made for this mystery of the skies near Gemini's western border.

Biggest Freezer in World.

The biggest freezer in the world, with a capacity of 50,000,000 pounds, has just been completed and is now in operation at the Chicago plant of a large meat-packing concern. It has been erected for the dual purpose of freezing meat products, particularly for export, and of storing products during the period of heavy production, to insure a supply at all times. The building is ten stories high and was erected at a cost of \$2,000,000.

Golf by Plane.

Two modern touches in golf were introduced at the big professional tournament at Glenelg, in Per-

shire, recently.

Airplanes, bringing spectators, arrived at regular intervals from Glasgow, 47 miles away, and every competitor wore a distinctive number on his jacket to facilitate recognition.—Daily Mail, London.

What He Said.

Paul and Gerald, twins, were visiting their grandmother in a distant city. One afternoon grandmother walked to the nearby grocery, taking Gerald with her. Paul was asleep. The grocer gave Gerald an apple which he silently accepted.

Grandmother turned to Gerald and said: "Now, what do you say?"

"Give me one for Paul."

A Forfeited Distinction.

"Why don't you write another letter to the paper and sign it 'Taxpayer'?"

"I can't conscientiously assume the title. I'm on the delinquent list."

Why Viz. and Oz?

The two abbreviations, viz. and oz., are seen and used daily, yet it is doubtful if many know their origin. Viz. is from the first two letters of videlicet; a Latin word meaning "namely." The oz. is a corruption of an ancient sign, something like a 3, that was placed at the end of an abbreviated word. In course of time the 3 has become a z. The same applies to oz., the abbreviation for ounce.

Nutritive Iron Tablets

An aid to Nature in rebuilding nerve force. If you are run down, anaemic, tired out, take these Nutritive Iron Tablets, and note improvement. 21-day treatment. Price 1.00.

The San-Jox Agency

Is Your Health O. K.?

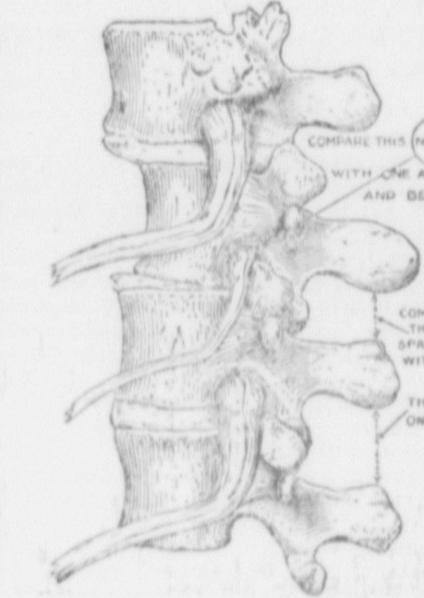

Your Health is going to be O. K. as long as there is complete uninterrupted connection between brain and tissue cell. But the situation is this: There are 31 pairs of nerves cables, each containing thousands of nerves which branch off from the spinal cord (the main cable from the brain), carrying the nerve energy to every tissue cell of your body. BUT they must pass out between the vertebrae of the spine, and when the vertebrae are not in alignment, the nerve cable are subject to pressure and the connection between the nerve cell and tissue cell, supplied by the impinged nerves, is not complete, the tissue cell does not get its full quota of nerve energy (health) and the RESULT IS DISEASE.

PAY DAY SPECIALS

We have 100 Suction Vacuum Sweepers which we place on sale next Friday afternoon at 2:30 for the **\$1.98**

This is not the ordinary type of carpet sweeper but one that does the work of both the sweeper and vacuum cleaner. It is light running, operates no harder than the ordinary carpet sweeper, but does much better and more effective work.

When you consider that the cheapest Bissell sweeper retails for \$6.25 you will realize what a tremendous value this is.

If you were fortunate enough to secure one of the hundred 98c sweepers which we sold last year you will certainly want one of these wonderful cleaners. They are made by the same company and guaranteed to give equal satisfaction.

The suction and power are so great that they will pick up cuff buttons, small coins (up to and including a half dollar) and other small articles.

You cannot afford to miss securing one of these wonderful cleaners, at the remarkable price of \$1.98.

No telephone orders, no deliveries, no holds, no charge accounts.

Call for your sweeper, pay your money and take it away with you.

REMEMBER TO BE HERE AT 2:30 FRIDAY AFTERNOON.

MORE REDWOODS
ARE PRESERVEDTHARP TRACT, CALIFORNIA, IS
GIVEN GOVERNMENT BY THE
GEOGRAPHIC SOCIETY

IS PART OF GIANT FOREST

Federal Agencies Are Co-operating in
the Effort to Save the Famous Great
Sequoias From Accidental and De-
liberate Destruction.

By JAMES P. HORNADAY.

Washington.—Acceptance by the de-
partment of the interior, through
John Barton Payne, secretary of the
interior, and Stephan T. Mather, di-
rector of the national park service, of a
deed for a tract of 130 acres in
Giant forest, California, will preserve
for future generations a group of the
largest and oldest trees in the world.
The donor was the National Geo-
graphic society, and the presentation
was made by Gilbert Grosvenor,
its president.A member of the National Geo-
graphic society, who had long been
interested in the efforts of the society
to preserve the big trees, subscribed
\$13,000 toward their purchase. Part
of the Giant forest was purchased in
1916, when the National Geographic
society supplemented congressional
appropriation by a gift of \$20,000. At
that time 617 acres of the forest were
bought. The society has been untiring
in its efforts to save the Giant
Sequoias from devastation. The latest
addition to the government's for-
ests is known as the Tharp tract.
There is still one area which is not
under control of the government.An automobile speeder tried to beg
off from fine on the ground that he
had nine children. He had come near
killing a dozen other people's children.Hist! Maybe the reason the hard-
coal operators don't want to show
their income tax sheets is that they
are ashamed of their poverty.From the statement of a lot of
manufacturers, you'd think that the
more they charge for their products,
the less they make.The trouble about coal is that only
half as much as usual is being mined
and that half is always being shipped
somewhere else.An enumeration of the Giant Se-
quoia trees in the latest addition has
not been made. One of the giants is
said to be as large as the famous
Sherman tree, known widely as the
super-giant of the towering timber-
land and one-half as high as the
Washington monument. The Sherman
tree has a girth of approximately
36 feet. There are other trees in
the tract which exceed the height of
that 279-foot giant, but few which
approach its girth.

Not Surpassed Anywhere in World.

In submitting a favorable report on
a resolution directing the secretary
of the interior to make an investigation
and submit a report as to securing
a stand of typical redwood trees
as a national park, the committee on
public lands said that in height and
in quantity of material, as well as in
the beauty and density of their
forests, the trees were probably un-
surpassed by any other forest in the
world. The committee's report, which
was adopted by the recent session of
congress and under which the secre-
tary of the interior is carrying forward
the investigation designated, pointed out further that as these trees
are more than 2,000 years old they
are among the oldest living things on
the earth."They are nature's monuments, well
worthy of preservation," the committee
said. "These forests are unquestionably
among the most admirable things in nature on our continent.
All will readily agree that typical
stands of these trees should be pre-
served for the enjoyment, inspiration
and admiration of future generations.
The greatest stands of these trees are
located in the valley, comparatively
accessible and where the rapid encroachment of the loggers is threat-
ening the extermination of this
noblest type. Any successful effort
to save them must be made within
the comparatively near future. The
fire-resisting qualities of redwood, if
slightly aided by removal of dead under-
brush, will render any forest selected
practically immune from the
elements."People in the United States, where
bats are comparatively rare animals,
have no idea of the variety and abun-
dance of them in such a place as
Jamaica, or of the important economic
value of the bat. They are either in-
sect-eating or feed on fruits. The in-
sect-eating variety are small for the
most part, and have considerable
value as insect destroyers. They feed
on mosquitoes and on a great variety
of winged insect life, many of which
are obnoxious to man or injurious to
agriculture.

AUSTRALIA HAS MUCH IRON

Engineers Report Immense Quantities
Available in the Southwest Part
of the Country.Mining engineers have reported to
the Australian government that im-
mense quantities of iron ore are avail-
able at Yampi sound, in southwest
Australia. The estimate puts the
amount of ore available—that is, in
sight above sea-level—at 97,000,000
tons. The larger quantities are on
Koolan island, where the lode rises
600 feet above the water line; the lode
is over 100 feet wide, and is traced
for nearly four miles, but really ex-
tends right through the island. On
Cockato island the height is 300 feet,
the lode running from end to end of
the island.The quality of the ore is exception-
al. There is only 1 per cent of silica
present and very little sulphur. These
analyses compare favorably with the
best known iron deposits in the world.
Newfoundland (Bell Island) ore is
51.80 per cent metallic iron, with 9.50
per cent silica. The French ores run
to 57.23 per cent, the Cumberland
(England) to 48.80 per cent, the Spanish
(Bilbao) to 50.84, and the Algerian
to a mean of about 50.

Bolshevist Stud Farm.

In the Live Stock Journal of London
a correspondent relates the observa-
tions of an English horse-trainer re-
cently escaped from Russia: "The Bol-
shevists went to all the stud farms and
divided the stock among themselves.
The best stallion in Russia, imported
just before the war at an enormous
expense, was given to a peasant, who
took the horse off to his village in the
interior to draw his cart for a few days
and then be slaughtered for food. The
Bolsheviks then started an improved
stud farm under nationalistic manage-
ment. They made it up of six stallions
and one mare."The National Geographic society
and its members have been active in
the campaign to preserve the red-
wood giants, and the society's gift
makes certain the addition of another
group of the trees to the redwood
forests already set aside by the govern-
ment.Miss Miranda Steele, eighty-four

ASK FOR JOINT POLE AGREEMENT

Northwestern Telephone Exchange Company Submits Contract to Water and Light Board

ELECTRICAL WORKERS INCREASE

Secretary Wm. Nelson Gives Notice to Board of Leaving Service. About October 1

The water and light board met in regular session with Commissioners Weidemann and Arnold present. President Carl Zapfie was absent.

Joint Pole Agreement

A joint pole agreement with the Northwestern Telephone Exchange company was taken up. Representatives of the telephone company were present and discussed the features with the board. Action was deferred and the secretary instructed to draft a contract which would be satisfactory to the city and have ready for next meeting.

Reports

The city engineer reported on work on the new water supply. The secretary reported on the finances of the new water supply.

Routine bills and payrolls were allowed.

A letter from the city clerk was read regarding poor lighting service and also regarding water being off during the noon hour. On motion the letter was referred to the Cuyuna Range Power Co.

Secretary to Leave

Secretary Wm. Nelson notified the board that he would leave the service in the water and light departments about October 1, or as soon as a successor has been selected. Mr. Nelson has been secretary for the past eleven and a half years.

Ask for Increase

Electrical workers appeared in a body and asked for an increase in pay. On motion by Commissioners Arnold and Weidemann, an increase in pay will be granted to take effect August 1. The matter of back pay is to be taken up at a later meeting when all board members are present.

E. L. Dahl, meter reader, and Oliver Peterson, plumber, asked for more pay. Both were promised an increase to take effect August 1.

Asks Adjustment

R. R. Gould asked for an adjustment of the rate charged for elevator service in the Iron Exchange building. The board promised to look up and take some action at a later meeting.

Water Service

G. A. Krueger asked for water service at 419 Kindred street. The secretary was instructed to look up the nearest house service with a view of furnishing the premises with water.

COMMUNICATION

To the Editor of the Brainerd Dispatch:

We note in your paper a few days ago the telephone company's statement.

If the local management had not made their threats (of which we have ample proof) that they would break the union and they would get us one by one there would have been nothing to say.

It looks to us in all fairness that some members of the local management should be asked to resign for an infraction of what must be one of the rules of the company, as well as coming pretty near to a breach of the laws of the state of Minnesota.

"But we have another grievance, and that is one of bread and butter" our lowest wages are \$10.00 per week and our highest \$12.50 per week.

We leave it with the conscience of the officials of the telephone co., whether or not the above wages can be called today, "living wages" or whether they can be called good wages as the telephone company claim they pay in their telephone directory on page No. 2.

Both the great parties have come out for collective bargaining, and maybe before very long large corporations will be made by law (if their conscience will not do it) to treat their employees as human beings and not as chattels.

(Signed)

THE STRIKING OPERATORS

Mrs. R. T. Campbell Hostess

Mrs. R. T. Campbell was the hostess at a 1 o'clock luncheon Wednesday noon. Covers were laid for nine and the guests included Mrs. L. A. Emerson of Columbia, S. C.; Mrs. N. P. Osgood, of Fargo, N. D.; Mrs. R. H. Emerson of Minot, N. D.; Mrs. Skiles of Minneapolis; Mrs. Jane Wehring, Miss Nellie Emerson, of St. Paul; Mrs. Caroline Ditmar, Mrs. Charles W. Hoffman and Mrs. F. S. Parker of Brainerd.

Ice Cream Social

The Ladies Aid of South Long Lake will hold an ice cream social at the home of Leo Fairbanks, on Wednesday evening, August 4th.

CITY AND PHONE COMPANY POLES

Telephone Company Using 145 Poles of the City, and City 46 Telephone Co. Poles

WHERE THE CITY POLES ARE

At One Time the City Was Practically Free of Borrowing Northwestern Telephone Poles

With the submission to the Water and Light Board by the Northwestern Telephone Exchange Company of a proposed contract for joint use of poles, attention is centered on the contract now being considered by the board. Before any contract can be made and accepted by the city it must be concurred in by the city council.

At present the telephone company has 145 connections on city poles and the city has 46 on Northwestern poles.

A very good supper was provided by the boys, and the solos sung by Al Mraz, also the short talk by Mr. Rice were thoroughly enjoyed. It is planned to have social evenings more frequently with the beginning of Fall.

Much credit is due the members of the committee for the arrangements which afforded genuine pleasure to everyone present.

BRAINERD'S ODDEST STORIES OF TODAY

Mrs. Elizabeth Fleener, faithful reader of the Dispatch, followed the detour published to get on the Oak street cement paving by going over Norwood to 19th street and thence south to a block to Oak. This detour was given the Dispatch by Eugene W. Schmidt of the county engineer's department. Mrs. Fleener says Oak street, torn up as it is, is infinitely better to drive a car on than Norwood, for Norwood is not in standard shape.

Mention was made of a roadster bought by Bill Turcotte and Ben Lagerquist. It is not a Ford, but a rebuilt Student-baker, condensed it is believed, from a five passenger to a 2½ passenger car. It just eats up the road between Brainerd and Squaw Point and straddles ruts with perfect equanimity.

South Side

Bluff Avenue, from Maple to Laurel, 9 poles.

South Sixth and Quince, 1 pole.

Norwood, from 6th to 7th, 4 poles.

10th and Front, 1 pole.

Along railway, 6th to Broadway, 6 poles.

Alley between Front and Laurel, from Bluff Avenue to 6th, 12 poles.

North Side

Alley between Broadway and Ninth, from Bluff to Main, 21 poles.

Alley south of Episcopal church, 4 poles.

Alley south of First Baptist church, 2 poles.

Alley from Kingwood between 5th and 6th streets, 1 pole.

Alley between 4th and 5th streets from Holly to Main, 12 poles.

HAVANA A BABEL OF SOUND

New Yorker Alleges That Metropolis Is Silent in Comparison With the Cuban City.

Havana may not hold the noise championship of the world, but at least little old New York is silent by comparison. Unmuffled motors beyond computation, tram cars that seem far more interested in producing clamor than speed, bellowing venders of everything vendible, are but the background of an unbroken uproar that permeates every nook and cranny of the city. Honest hotel keepers tell you frankly that they can offer every comfort except quiet. Even in church you hear the tumult outside, broken at rare intervals by the voice of the preacher. It is not simply the day-time uproar of business hours, it increases steadily from nightfall until dawn. In olden days the sereno, with his dark lantern, his pipe, pistol, bunch of keys, whistle and rope, wandered through the streets calling out the time and the state of weather.

FOLEY KIDNEY PILLS
FOR BACKACHE KIDNEYS AND BLADDER

every half hour. His efforts would be wasted nowadays.

The long-seasoned inhabitants seem to have grown callous to the constant turbulence. I have yet to meet a newcomer who confesses to an unbroken hour of sleep. If you move out to one of the pensions of Vedado, the household itself will keep you constantly reminded that you are still in Havana. The Cubans seem to thrive on noise. If they are so unfortunate as to be denied their beloved din, they lose no time in producing another from their own throats. After a week in Havana we took ferry across the harbor and strolled along the plain behind Cabana fortress. For some time we were aware of an indefinable sensation of strangeness, amounting almost to discomfort. We had covered a mile or more before we suddenly discovered that it was due to the unaccustomed silence.—Century Magazine.

Lee Tide, by Lee Axworthy out of Emily Ellen, is touted as one of the great two-year-olds of the season. Lee Tide is the property of David Look.

The first contests for the Wightman tennis cup for women have been postponed to 1921 because of the inability of European clubs to send teams this year.

Olympia fields is out with a bid of \$2,000 for a match between the British players and James Barnes of St. Louis, western open champion, and Walter Hagen of Detroit, national open titleholder. The club would stage the event as an aftermath of the western open tournament in August.

REALLY NO GREAT MYSTERY

Though at First It Did Seem Remarkable Where Those Boy Scouts Were Coming From.

Now there are boy scout stunts and boy scout stunts, but it took a Terre Haute troop to put over the best one. It was at a meet at the First Baptist church, and they were illustrating an early morning at their summer camp, Klinneumapoosie. The scenery, except for a small pup tent, was the regular church furniture. But still the audience could stretch its imagination enough to make the scene effective.

The first streak of dawn was announced, and then slowly there emerged from the pup tent a yawning, stretching scout. A wee interval, and another followed him. Another lapse of time, and another scout emerged from the tent. Then came others until there were 12 on the platform, and still others were coming. The audience was almost incredulous with amazement, for, as everyone knows, a pup tent is so small that it cannot accommodate more than three boys at the limit.

Then out started the thirteenth, and evidently he was too sleepy, for he jostled the tent so that it slipped away from its mooring, and there back of it was the entrance to the pool for baptism. The youngsters had been concealed in it and used the tent merely as an entry to the platform.—Indianapolis News.

Best Method of Reform.

The way to reform men is not by taking away their pleasures and their happiness, but by dealing with them in a spirit of Christian charity and honorable justice and giving them more happiness.—St. Pierre.

Bread Kneaded on Korean Streets.

Bread is kneaded on the streets, and with an excellent thoroughness, in Korea. After mixing, the dough is placed on a board in the road in front of the little bakeshop. Then two stalwart Koreans proceed to pound it with great beetles. The natives do not claim that the quality of the bread is improved by the addition of impurities in the way of insects and dust which naturally result from the open-air treatment, says a bulletin of the National Geographic society. But if one objects to eating it, a native will quote a proverb which, being interpreted, runs: "He who would enjoy his food should not look over the kitchen wall."

WANTED—2 waitresses, wages \$40 month, 9 hour work. Ideal Hotel.

9314-45tf

Firestone

Sales of this tire have increased 96% the first six months of this year, proving the balanced tire, the Firestone 3½ has accomplished what Firestone sought for it, more mileage, greater economy, greater comfort, which has been passed on to the public at low cost—most miles per dollar.

Balanced! That means to you more than mere thickness of tread, greater air capacity, more plies of fabric, greater cushioning, or the gauge of the sidewall. It means that all component parts of the Firestone 3½ are scientifically balanced by specialists who have put years of study and practice into a single purpose—to meet your demand in a small car tire. You can now have all four tires on your car give uniform service if they are Firestone.
